

Order your free rain barrels today!

Visit villageofalsip.org - Residents Info or stop by the Alsip Village Hall for an application. Submit your completed application to: Alsip Public Works
4500 W 123rd St
Alsip, IL 60803

Free delivery
55-gallon capacity
Available in four colors

Terra Cotta

Blue

Black

Cream/Tan

Includes flexible connecting elbow, linking hose and detailed instructions

You can make a difference to help improve water quality, prevent flooding and save on your water bill!

Disconnecting your downspouts and installing rain barrels will keep clean water out of the sewer system and provide you with a source of free water.

The Village of Alsip is happy to offer free rain barrels to our residents. This rain barrel program is a cooperative effort by the Metropolitan Water Reclamation District of Greater Chicago and participating communities.

A smart idea

Rain barrels capture rainwater from your roof and save it for when you need it. By keeping this water out of the sewer system, they can also help prevent sewer overflows and flooding.

You can use rain barrel water to wash your car, water your lawn, or clean work boots and tools. Rain barrel water is naturally free of chlorine, lime, and calcium and some gardeners swear their plants prefer it. However, since rain barrel water is runoff from your roof, do not drink it!

A part of any yard

Most homes can benefit from several rain barrels. If you have areas of unpaved, pervious ground near your downspouts, rain barrels should work in your yard. Homeowners throughout Cook County have incorporated rain barrels into their yards with great results.

Green and upcycled

Rain barrels are a type of green infrastructure, a new approach to managing stormwater by keeping rain on the property and out of the sewer system.

Our rain barrels are made using repurposed, or upcycled, food barrels so they are doubly green.

Easy to install, easy to use

Installing a rain barrel is easy and only requires a few tools. A connecting elbow and detailed instructions are provided with all rain barrels. Once it is connected, you just need to wait for rain and your barrel will be ready to use.

A rain barrel at work

Green infrastructure

Rain barrels are just one type of green infrastructure that can capture water to help prevent flooding and improve water quality. Green infrastructure mimics the natural environment by holding stormwater where it falls. Other types of green infrastructure homeowners can incorporate into their property include rain gardens, permeable pavement, cisterns, native landscaping, stormwater trees and green roofs. Municipalities throughout Cook County are also going green, utilizing greenways, wetlands, green alleys, streets and parking lots to help capture water.

Water from this home's roof is directed into the beautiful rain garden in its front yard.

Rain Barrel Program

The Village of Alsip has enrolled in the Metropolitan Water Reclamation District of Greater Chicago's (MWRD's) new rain barrel distribution program that offers complimentary rain barrels to Cook County residents and organizations.

What are Rain Barrels?

Rain Barrels collect and store rainwater, and they include a system for diverting downspout water into the barrel. They also have an overflow connected to the downspout to divert excess water safely away from the house.

What are the benefits of Rain Barrels?

Water Conservation - Use the water stored in rain barrels to water your lawn, garden or plants.

Reduce Storm Water Runoff - Rain Barrels divert storm water and reduce the strain on our sewer system during major rain storms.

Healthier For Plants - Unlike tap water which contains chlorine, rainwater contains no additives that could be harmful for your plants. The increased acidity in rainwater will also better enable plants to pull nutrients from the soil around them.

What colors are available for Rain Barrels?

The current colors available are cream/tan, terra cotta, black and blue.

Cream / Tan

Terra Cotta

Black

Blue

To learn more, please see our Rain Barrel Information Flyer at villageofalsip.org – Resident Info. If you would like to submit an application for a rain barrel, please download a copy or stop by Public Works Monday-Friday from 8:30 a.m. to 3:30 p.m. or call at (708) 385-6902 ext 364.
